Adapting Osteoporosis Services post COVID-19

It was easy to stop DXA & FLS but still awaiting the go ahead to restart

How do we even begin to restart DXA services?

The waiting lists for DXA will be years long – how do we ever catch up?

Do we just accept that we have missed lots of patients during the pandemic and write them off for FLS and start again?

DXA is not a priority to restart in our hospital

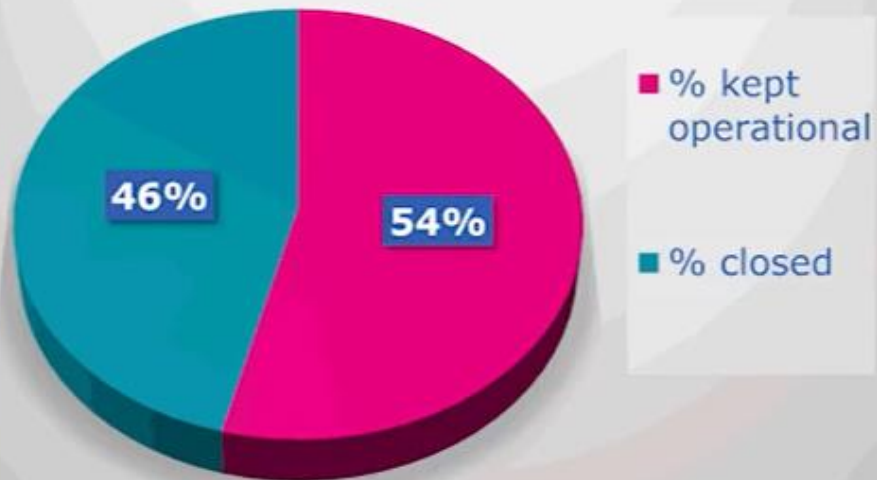

We can only DXA half the number of people in a day now

We must change our FLS completely – no more one stop clinics- patients will either get a telephone call or a video call

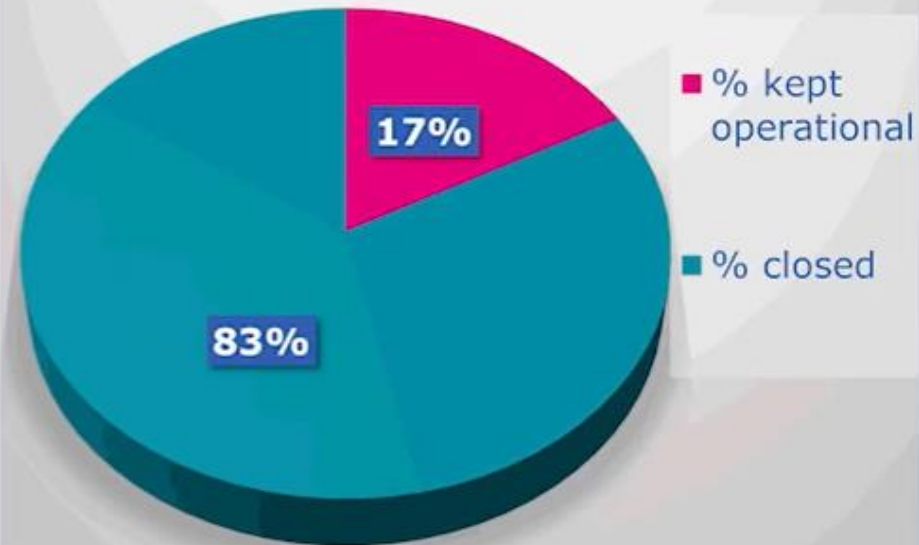

UCB/ROS Webinars Survey

Survey data: FLS and DXA services

FLS service provision during
COVID19 lockdown

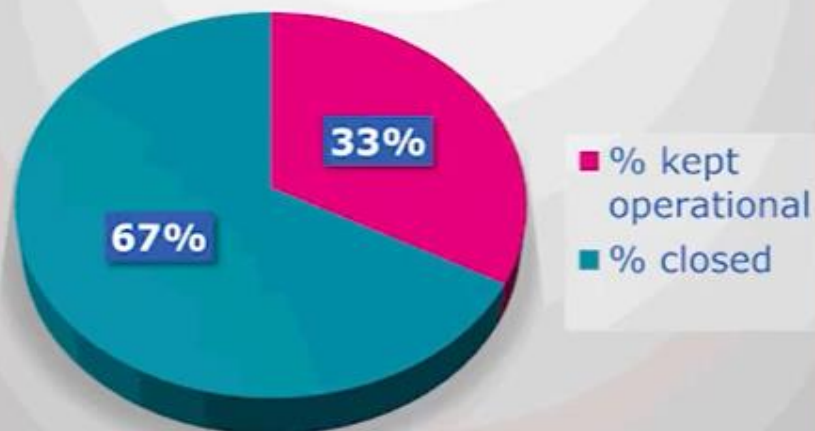

DXA service provision during
COVID19 lockdown

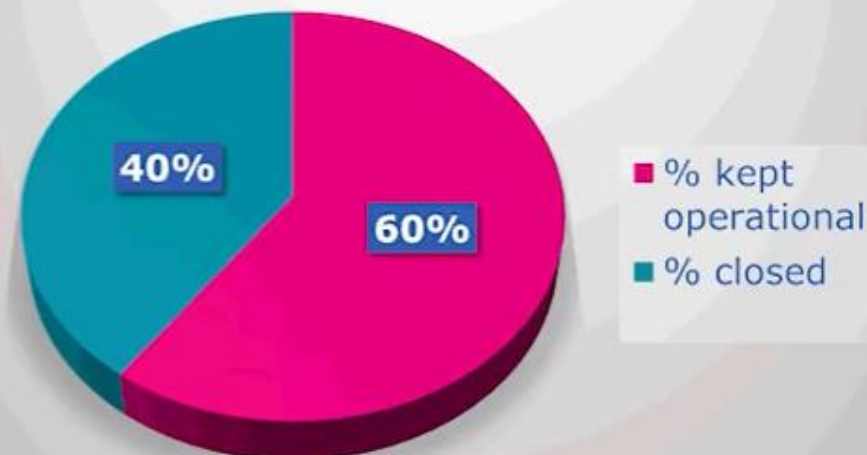

UCB/ROS Webinars Survey

Survey data: IV and denosumab treatments

Facility to administer iv therapies

Facility to administer denosumab
